

MUT STREET SWEEPER

UNIVERSAL. AGILE. PRECISE.

The perfect choice for clean roads.

The **MUT STREET SWEEPER** sweeper has proven itself through its high level of reliability combined with maximum precision in city cleaning, surface cleaning, gutter cleaning or construction site cleaning.

The ergonomic and at the same time robust design in perfect combination with a wide range of equipment options make the **MUT STREET SWEEPER** one of the best and most efficient cleaning vehicles on the world market.

EFFICIENT

The innovative, compact design enables extremely fast and flexible use of versatile functions:

- Swivel and telescopic front brush for increased sweeping width
- Side brushes with 3D tilt adjustment
- High-pressure washing bar can be folded out at the front
- Manual suction system especially for leaves or sediment traps
- Additional water tank - made entirely of stainless steel - precisely adapted to the vehicle conditions
- **High-pressure hose reel with spray lance**

SAUBER

- PM certified (****)
- Fine dust-free operation thanks to special air circulation system for minimal environmental impact - especially for inner-city use
- Pure suction system for maximum efficiency
- Highly effective filter sets
High impermeability due to the design of the system
- Special fine dust nozzles wet the dirt particles for optimum precipitation in the collection container - without dust pollution outdoors (optional)

SAFE

- Automatic locking of the lid
- Increased operational safety, energy efficiency and quiet running thanks to state-of-the-art electronics

ELECTRIC

Into an emission-free future with **MUT ELECTRIC** (optional) emission-free future: MUT vehicles are electrically powered and, compared to conventional compared to the conventional drive concept, guarantee greater economy and longer service life service life.

FLEXIBEL

- body size up to 12 m³ and more possible
- stainless steel container for refuse
- for two- to three-axle chassis
- hydrostatic traction drive (optional)
- sweeping operations possible up to -7° C
- stainless steel water tank with capacity from 1.700l to 5.000l
- fan power up to 30.000 m³/h
- high pressure pump, with adjustable data of performance, from 120 bar to 400 bar and more
- double protected water pump: against dry run as well as overheating
- integrated aperture for bulky goods
- integrated foliage grids
- washing facility for the container
- rinsing facility for the fan
- sound insulation for particularly noise reduced operations, e.g. in the inner city
- Industry X.0-capable - for an ideal digital integration into the fleet
- panels on the side can be used as a large advertising space
- minimum warranty of 2 years

EXPANDABLE

MUT vision and safety packages

- Camera system, up to 360° all-round visibility
- LED all-round light
- Numerous other options available

MUT EASY WORK packages

- Sweeping unit on both sides
- High-pressure washing bar with rotary brush
- Front-mounted brush
- Rear suction system across the entire width of the vehicle
- Telescopic high-pressure front wash bar
- Enlarged suction mouthpieces (construction site)
- Rotary jet system at the rear
- Front feeder brush under the bumper

MUT Service packages

- Warranty extension up to 60 months
- Fleet support incl. annual inspection
- MUT All In" service package"

MUT multifunction touch display

- Central control of the body
- Simple operation of all process steps
- Individually configurable: e.g. to enable problem-free driver changes in the fleet

MUT EXPERIENCE

Sophisticated MUT design

Uniform axle load distribution in the various loading conditions, optimally coordinated components and variable configurability make the MUT STREET SWEEPER the most flexible sweeper on the market. High system tightness due to the design.

Health and safety at work

Automatic rear section locking, good vehicle overview and optimum illumination in the work area. Ergonomic design and low-noise operation thanks to optimized system design.

Cost-effectiveness and high availability

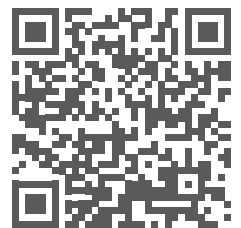

High flexibility due to low dead weight, low-maintenance and durable design: Low wear due to the use of stainless steel components and few moving parts. Increased travel speed possible thanks to perfectly matched components.

Comfort

Simple operation via customizable MUT multifunction touch display. Industry X.0-capable - for perfect digital integration into the fleet.

Model diversity and modularity

Available in various body sizes with variable performance data - for different applications and customer requirements. The large selection of additional equipment in the areas of safety, environmental protection and comfort as well as a wide range of accessories allow the MUT STREET SWEEPER to be individually adapted to the required demands and tasks.
