

PRESS MUT

FLEXIBLE. VERSATILE. SAFE

Your ideal partner for waste collection

MUT
STEYR AUTOMOTIVE

FLEXIBLE. VERSATILE. SAFE

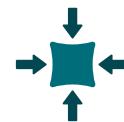

Key facts

body size up to
26.5 m³

wear-resistant
container base
made from a single
piece

efficient
compression

available in a
version suitable for
organic waste

The **PRESS MUT** proves itself through its high reliability and at the same time maximum variability for the collection of all waste fractions: from household waste to cardboard and plastics.

Its greatest advantage is the universal use under the most difficult conditions. From smallest containers to the largest ones, with a lifter system or manual loading – everything can be put into our **PRESS MUT** any way you want.

variable, flexible & safe

The compact rear section enables all tipping systems to be mounted quickly. In addition, the space-saving design shortens the rear overhang and simultaneously ensures high ground clearance and an optimized axle load ratio. It is these details that make our **PRESS MUT** the maneuverable, low-maintenance all-rounder in your fleet.

Our **PRESS MUT** is also designed to be as safe as possible for your drivers and bystanders: features such as the automatic rear locking system or our MUT running board are always designed with safety in mind.

additional highlights

every **PRESS MUT** comes with:

- + a wear-resistant container floor made from one piece
- + efficient compaction thanks to
- + adjustable counter-pressure system adapted to the waste fraction
- + filling elements between rollers and sliding wall to prevent deposits

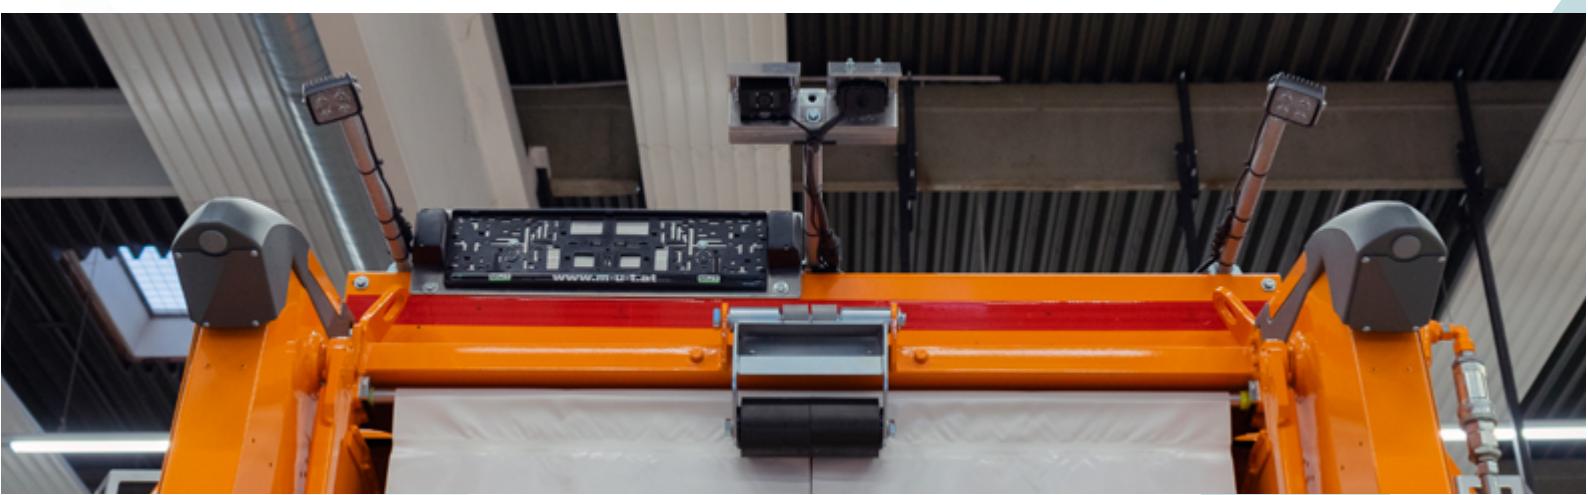

additional features

There are also many other functions that make your life easier and your tours more efficient.

These include:

- + high container for additional 2 m³ volume
- + low container for operation in cities with low passageways
- + hardened steel roller bearings
- + reinforced Hardox450 loading tray
- + „Clean Air“ air filter system
