# ROTO MUT

LIGHTER. FASTER. SAFER.

The perfect partner for waste collection.

The **ROTO MUT** proves itself through its **rotary drum principle** especially for the collection of moist household waste and similar commercial waste. The perfect combination of possible equipment variants makes the **ROTO MUT** one of the most economical refuse collection vehicles.

## VARIABLE

The **attachment frame** specially developed by **MUT** and integrated into the rear section **shortens the rear overhang** and thus **optimizes the axle load ratio** of the vehicle. This enables the perfect integration of all body variants in order to optimally configure the vehicle for the respective requirements.

## myMUT

- revolutionizes vehicle management
- Industry X.0 digitalization platform Parameters such as load, vehicle status, maintenance info / portal (MUT-SIP) & many other values can be called up
- Cloud data transmission

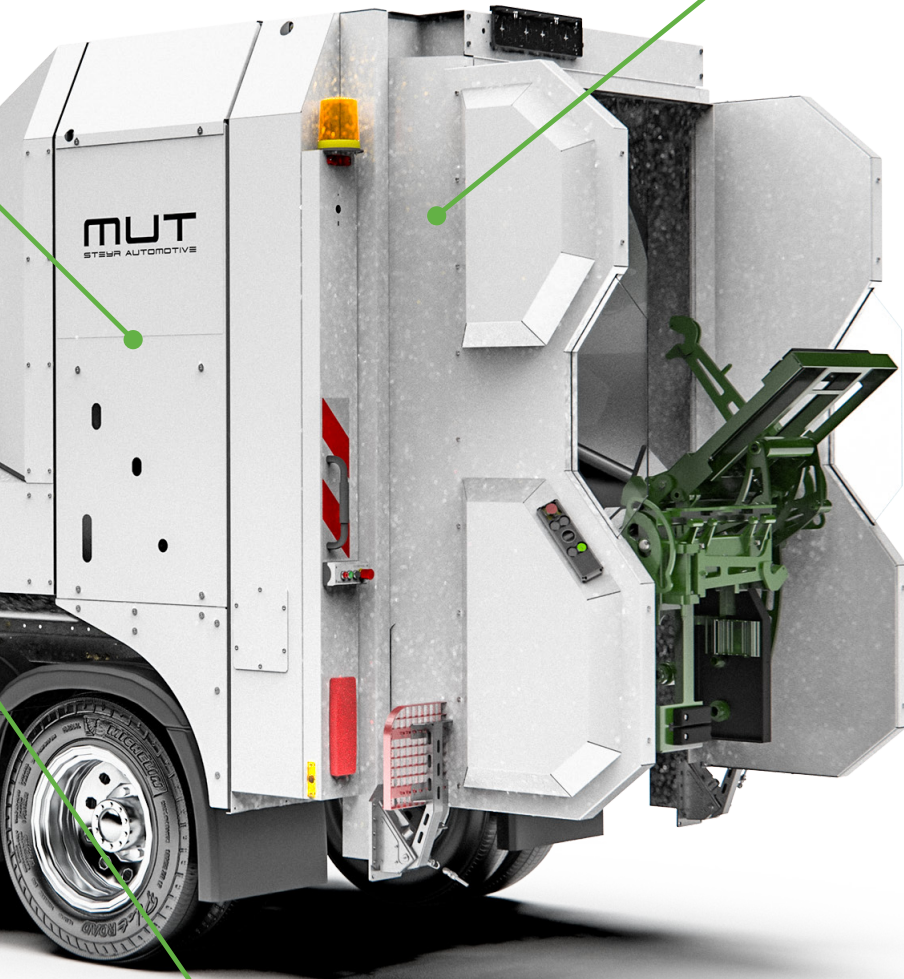

## ELECTRIC

**100% ELECTRIC**  
**0% HYDRAULIC**

- quiet
- low maintenance
- Optimized compaction performance

With **MUT ELECTRIC** (optional) into an emission-free future:

All MUT components are **purely electric**, guaranteeing far greater economy and a **much longer service life** than conventional drive concepts.

## FLEXIBLE

- Body sizes from 5.0 - 24.0 m<sup>3</sup>
- For two- to four-axle chassis
- High compaction of waste - up to 1:5
- Perfect collection solution in cities and rural areas

### STYLING DESIGN

- Cladding for additional noise reduction
- Can be used as generous advertising space

### NAKED DESIGN

- Exposed rotary drum
- With conically shaped transition plates at the rear to deflect branches
- Can be used as advertising space

### MINI

- size down to car width
- Body sizes from 5-9.5 m<sup>3</sup>
- Perfect solution for narrow collection areas and low passages
- Available in both styling design and naked design

## EXPANDABLE

### Clean Air MUT

No environmental pollution from dust, odors or harmful aerosols. Direct air extraction in the work area behind the vehicle, permanent air filtration through low-maintenance Clean Air MUT filter unit. Increases worker protection.

### MUT vision and safety packages

- Turn assistance system
- Driver assistance system
- Camera system, up to 360° all-round visibility
- Extended lighting package

### MUT EASY WORK packages

- High-pressure container washing system incl. water heating unit
- Container for special tools

### MUT Service packages

- Extended service and care package

The perfect partner for waste collection.

## REAR LOADER ROTO-MUT

### Sophisticated MUT design

Balanced axle load distribution in different loading conditions.  
For use with standard DIN fills.

### Safety at the workplace

Automatic rear lid locking, weight-monitored footboards, ergonomic design and the optional **Clean Air MUT** system for air filtration in the work area.

### Cost-effective

High payload due to low dead weight, low-maintenance design and durable components.

### Availability

Low wear due to the use of stainless steel components and low maintenance requirements due to few moving parts.

### Comfort

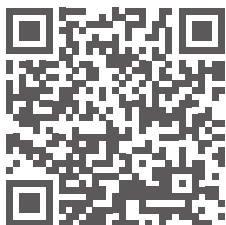

Low-noise operation thanks to soundproofed rotary drum.  
Simple operation via customizable **MUT multi-touch display**.

### Modellvielfalt

Available in various installation heights, widths and lengths for different applications.

### Options

A large selection of additional equipment in the areas of safety, environmental protection and comfort as well as a wide range of accessories enable the refuse collection vehicle to be individually adapted to the required demands and tasks.
